- Built with: React, Tailwind CSS, JavaScript
- Features: Responsive design, reusable UI components

Barbershop Booking System

 Live Demo: <https://barbershop-six-flax.vercel.app/>

- Built with: React, Firebase, Tailwind CSS
- Features: Select barber, choose date/time, confirmation notifications
- Impact: Improved user experience by allowing flexible booking & real-time availability

Technical Experience

Front-End Developer (Independently Trained) | 11/2023 – Present

- Developed 3+ responsive web applications with React, integrating REST APIs and state management.
- Implemented authentication & real-time database (e.g., Firebase, Supabase) for user management.
- Built custom reusable components using Tailwind CSS for scalability and maintainability.
- Currently learning Redux, TypeScript to deepen expertise in scalable web applications.

Previous Experience – Hospitality Leadership

Revenue Manager | Carnival Cruise Line (2020 – 2023)

- Led a team of 25+ in high-pressure environments, improving efficiency by 20% through workflow automation.
- Mentored junior staff in customer service, digital tools, and problem-solving.
- Developed strategic thinking & leadership skills, which translate into user-centered development.
