

Olga Minaieva

Frontend Engineer | React | TypeScript | Interactive Web Applications

Ontario, Canada | minaeva9@gmail.com | github.com/OlgaMinaievaWebDev

PROFILE

Early-career frontend engineer with hands-on experience building responsive web applications with React, TypeScript, Next.js, Tailwind CSS, and TanStack Query. Skilled in reusable component architecture, REST API integration, authentication, server-side rendering, and collaborative delivery through pull requests and code reviews. Brings customer-facing experience from Ontario's casino sector, an interest in real-time interactive products, and practical use of Cursor, Codex, and ChatGPT in development workflows.

CORE SKILLS

Frontend: React, TypeScript, JavaScript (ES6+), Next.js App Router, HTML5, CSS3, Tailwind CSS

State & APIs: TanStack Query, React Hooks, Context API, REST APIs, Fetch API, authentication

Backend & data: Node.js, NestJS, Fastify, Prisma, Supabase, PostgreSQL

Engineering tools: Git, GitHub, Docker, Postman, ESLint, Prettier, VS Code, Cursor, Codex, ChatGPT

Practices: Responsive design, component architecture, code reviews, pull requests, Agile, CI/CD fundamentals

SELECTED PROJECT

OpenAPI Playground | *Team Lead, 3-person team*

Next.js | React | TypeScript | Supabase

- Led sprint planning and coordinated delivery across a three-developer team working in different time zones.
- Helped define frontend architecture and reviewed pull requests to support maintainable, consistent implementation.
- Built responsive Next.js features and contributed reusable React components using TypeScript.
- Implemented authentication and REST API integration with Supabase-backed data flows.
- Contributed to decisions around server-side rendering and Next.js client/server component boundaries.

EXPERIENCE

Customer Service Representative | *Casino XYZ, Ontario*

2024 - Present

- Resolve customer issues accurately in a fast-paced, high-volume gaming environment while following company policies and compliance requirements.
- Collaborate with cross-functional teams to keep daily operations smooth and customer experiences consistent.
- Manage competing priorities under pressure, communicating clearly and taking ownership through resolution.

EDUCATION

RS School | React Development Course - In Progress

Expected completion: July 2026

Coursework and projects: JavaScript, TypeScript, React, Next.js, Node.js, component architecture, state management, API integration, testing, Git, and team-based software development.
